📁 Profile

Detail-oriented Mid-level Backend Developer with over a year of professional experience in building robust, large-scale web applications using PHP and Laravel. Proven track record of managing the full software development lifecycle, from database design (MySQL, MongoDB) to deploying RESTful APIs and integrating frontend technologies like Vue.js, jQuery, and Tailwind CSS. Strong command of OOP, SOLID principles, and design patterns (MVC, HMVC, Repository). Skilled in cloud integration (AWS S3, SES) and version control with Git. Adaptable and proactive, with expanding proficiency in Node.js and Python, dedicated to delivering high-quality, scalable solutions.

📁 Professional Experience

12/2025-Present Backend Developer, DotLaa Solution

- Architected and developed complex backend systems for multiple platforms using the Laravel ecosystem, demonstrating proficiency in scalable application design and API development.
- Engineered a comprehensive hotel booking platform with real-time property management. Integrated seamlessly with Agoda and eZee Booking engines, and implemented an interactive WhatsApp chatbot to streamline customer reservations and automate support.
- Developed a highly secure backend for a matchmaking and matrimony application, implementing intelligent user-matching algorithms, end-to-end messaging features, and integrating Firebase for real-time push notifications.
- Built a scalable ride-hailing infrastructure featuring real-time geolocation tracking, dynamic driver-passenger matching algorithms, and complex, demand-based pricing models leveraging Spatie and Firebase.
- Leveraged advanced Laravel features and packages, including Spatie Translatable, Medialibrary, and Permission, for efficient content localization, media handling, and robust role-based access control (RBAC).
- Integrated diverse third-party services, including AWS S3 for secure media storage, Twilio for communications, and multiple payment gateways to ensure seamless transaction processing.

06/2024-11/2025 Backend Developer, Remah Digital

Cairo, Egypt

- Developed and maintained full-stack web applications using the Laravel framework, focusing on creating scalable and secure systems for various clients.
- Engineered RESTful APIs to support mobile and frontend integrations, ensuring seamless data flow and communication between services.
- Established clear performance metrics for the team which helped in tracking progress towards set targets effectively.
- Collaborated with teams to design database schemas, implement business logic, and integrate third-party services like payment gateways and notification systems.
- Engineered a secure, multi-lingual, and modular CMS for medical clinics with a focus on HIPAA compliance.
- Implemented encrypted media storage on AWS S3, secure patient data controls, and integrated Twilio for SMS, AWS SES for email.
- Developed a full-stack e-commerce platform with comprehensive product management (variants, attributes), order processing, client management, and a dynamic promotions engine.
- Integrated full multi-language (Arabic/English/Spanish) and RTL support for a localized user experience.
- Built a platform to manage the entire translation workflow, including order creation, dynamic pricing, payment processing (PayPal, Tap), and translator assignment.
- Implemented multi-role user management with distinct dashboards for Admins, Translators, and Customers.

01/2024-03/2024 Backend Intern, Active4Web

Cairo, Egypt

- Assisted the development team in building and maintaining backend modules using Laravel and MySQL.
- Collaborated on debugging and refactoring legacy code to improve application stability and performance.
- Gained hands-on experience with RESTful API development and learned best practices for clean code architecture.

Education

10/2021 - 06/2025 Computer Science
Cairo, Egypt (Shorouk Academy)

Cumulative Grade: Very Good
Project Grade: Excellent

Technical Skills

Front End Development

HTML, CSS, JavaScript, Vue.js, Tailwind CSS, Bootstrap, and JQuery

Front End UI Frameworks

Syncfusion and Telerik

Database

MySQL, SQLite, SQL Server, Firebase, MongoDB

VCS

Git, GitHub & Bitbucket

Backend Development

PHP, Laravel, NodeJS, Python, AWS S3, AWS SES, Alpine.js , PDO, Clean Architecture, Architecture Patterns (MVVM, MVC, HMVC), SOLID Principles, OOP, RESTful API, JSON, CodeIgniter, Authentication / Authorization, Performance Optimization

Design Patterns

Repository, Unit of Work, SignalR and Singleton

DevOps & Best Practices

Unit Testing, Agile / Scrum, CI/CD (Basic Knowledge), Docker (Basic Knowledge)

Courses

- PHP Laravel Full-stack Development - Route [2024]

Languages

Arabic Native

English Excellent

Soft Skills

- Leadership
- Excellent time management and communication skills.
- Capacity to teach others and self-motivated.
- Very good presentation skills.
- Easy adaptation to any work environment
